President di IOWUA Ta Pidi Empleadonan Tene Standard di Seguridad

Recientemente poni na exhibicion den Oficina Mayor tabata un plaqute di National Safety Council co-memorando Lago su funcionamento sobresaliente di seguridad den 1961. E premio di promer lugar ta esun de seis cu Lago a gana den competicion di National Safety Council.

Comentando arriba e realizacion di seguridad den 1961 di empleadonan di Lago den cual e frecuencia di 0.34 tabata di mas abao den historia di compania, F. H. Ritfeld, president di Independent Oil Workers Union of Aruba, a bisa cu e premio a realidat ta e producto final di esfuerzo-nan di empleadonan di Lago y directiva di Lago pa opera un empresa cu seguridad.

"Mi ta orguyoso di e contribucionan cu nos miembranan a haci pa gana e premio aki," presidente di IOWUA a bisa.

Obheto di Cada Uno

"Mester ta obheto di cada uno cu tra ha pa Lago pa manteene e standard halto di seguridad di Lago. Nos no por risca sosegando arriba nos laureles. Empleadonan tin responsabilidad pa nan mes y nan familia y na compania pa sigui practiconan seguro di trabao mescos cu compania tin responsabilidad di cumpli cu e condicionnan di e combieno di trabao. Empleadonan mester ta alerto pa peligronan observá y nan mester yuda compajeronan di trabao pa haci nan trabao cu seguridad. Nos tur mester tra ha hunto," Sr. Ritfeld a continua.

Aunque Lago tabatin solamente tres accidente incapacitante den 1961 — cual ta un otro record di seguridad — Sr. Ritfeld ta haya cu e ber-dadero significacion den e realizacion importante aki di seguridad ta e cantidad di empleadonan kende a evita desgracia door di atene nan mes na practiconan seguro di trabao.

"Mi ta urgi tur empleadonan di Lago pa haci nan best pa tene Lago e refineria mas seguro den mundo," el a conclui.

Haciendo e declaracionnan aki, Sr. Ritfeld hundo cu directiva tabata reconoce contribucionnan di empleadonan pa e programa exitoso di seguri-

Papiamento Sound Track Added to Film in Public Relations Film Library

The Public Relations Department film library now contains a film with the complete sound track in Papiamento. The film, "Roots of Happiness," is believed to be the first motion picture to have its narration in the Papiamento language. Public Relations added the sound track. The narrator is Severiano Luydens, PR tour leader.

The setting for "Roots of Happiness" is in Puerto Rico. It's a story about simple country folk — how they are, how they act with each other; how they are happy and contented, or miserable, and afraid. The work is hard; the land is poor. It is difficult for a man to earn a living.

Love and understanding that bring contentment and life's pleasures to one family are strongly contrasted with anger and hatred existing in another home. It's a film with impact, one that may give many viewers an insight to similar problems they might have.

"Roots of Happiness" has been shown a number of times to English-speaking groups in Aruba. With the addition of the Papiamento sound track, the film's audiences can be greatly increased on the island.

LAGO'S SIXTH first-place award plaque from the National Safety Council is hung in the General Office Building by E. M. O'Brien, safety division head. Looking on with approval are F. H. Ritfeld, foreground, IOWUA president, and B. C. Clarkson, assistant general manager. LAGO SU sexta plaqute como premio di promer lugar for di National Safety Council ta worde colgá den Oficina Mayor door di E. M. O'Brien, hefe di Division di Seguridad. Mirando ta F. H. Ritfeld, adilanti, Presidente di IOWUA, y B. C. Clarkson, asistente gerente general.

IOWUA President Urges All Employees To Maintain High Standards for Safety

Recently put on display in the General Office Building was a National Safety Council plaque commemorating Lago's outstanding safety performance in 1961. The first place award is Lago's sixth in National Safety Council competition. In commenting on the 1961 safety achievement of Lago employees, in which the frequency rate of 0.34

ment. Employees should be alert for observed hazards and should help fellow employees do their jobs safely. We must all work together," Mr. Ritfeld continued.

"I am proud of the contributions our members have made to earn this award," said the IOWUA president.

"It should be the objective of everyone working for Lago to maintain Lago's high standards for safety. We can't risk resting on our laurels. Employees have the responsibility to themselves, their families and the company to follow safe work practices just as the company has the responsibility of living up to conditions of the working agree-

ment.

"I urge all Lago employees to do their best to keep Lago the safest refinery in the world," he concluded.

Filmoteca di PR Contene 'Roots of Happiness' cu Narracion na Papiamento

Filmoteca di Public Relations Department awor ta contene un film cu un relato completamente na Papiamento. E film, "Roots of Happiness", lo ta e promer pelicula cu lo tin su narracion den idioma Papiamento. Public Relations a pone acerca e relato na Papiamento y e locutor ta Severiano Luydens, tour leader di PR.

E escenario pa "Roots of Happiness" ta na Puerto Rico. E ta un historia tocante hendenan di pueblo — ccm nan ta, com nan ta trata cu otro; com nan ta feliz y contento, of miserable y miedoso. Trabao ta duro; e pais ta pobre. Ta dificil pa un hendenan cu nan por tin.

E amor y comprension cu ta trece satisfaccion y placernan di bida pa un familia ta fuertemente poni en contraste cu rabia y odio cu ta existi den un otro hogar. E ta un film cu impacto, uno cu por duna hopi mirones un vista arriba problemanan similar cu nan por tin.

"Roots of Happiness" a worde munstrá varios bez na gruponan di habla Ingles na Aruba. Cu adicion di e relato na Papiamento, e audiencia di e film por worde aumentá hopi ariba e isla.

PETITE LESLIE Payton, age three, sells the first poppy on Poppy Day, May 12, to President W. A. Murray. Leslie is the daughter of Mr. and Mrs. J. J. Payton. Millions of the paper poppies are sold every year to aid disabled American war veterans.

E CHIKITO Leslie Payton, tres anja, ta bende e promer poppy ariba Poppy's Day, Mei 12, na Presidente W. A. Murray. Leslie ta yiu muher di Sr. y Sra. J. J. Payton. Miljones di poppy di papel ta worde bendí tur anja pa yuda Veteranonan Americano incapacitá door di guerra.

Changes in Pay Schedules Will Go into Effect June 8

Changes in semi-monthly and monthly pay schedules will go into effect June 8 as a further improvement to payroll operations. Only pay hours will be changed. Paydays will continue to fall on dates published the first of this year. On June 8, pay schedules for employees on the semi-monthly payroll will be reduced by as much as an hour and a half in the afternoon and increased a half hour in the morning at the Main Gate.

The morning pay schedules at the other three pay locations will also be changed.

Starting June 9, monthly paid employees will receive their pay envelopes in the morning instead of the afternoon. The ability to prepare the monthly payroll a half-day sooner has been made possible through the use of Lago's new IBM 1410 computer system which can do more things and carry more facts with greater speed and versatility than the IBM 650 computer system it has replaced.

The morning semi-monthly pay schedule at the Main Gate has been extended a half hour for the convenience of employees. New pay hours are from 7:30 to 8:30 a.m. Former time was from 8 to 8:30 a.m. Pay period at Gates No. 6, 8 and 9 will be 7:45 to 8:30 a.m.

At the Main Gate, the afternoon pay hours for semi-monthly employees will be 3 to 5:20 p.m. instead of the former time of 2:30 to 6:20 p.m. The pay hours will be reduced also at the other three locations. New times there will be: Gate No. 6 — 3:30 p.m. to 4:20 p.m., and Gates No. 8 and 9 — 3:30 p.m. to 4:30 p.m.

Study Leads to Changes

The changes in the pay schedules resulted from a recent study which showed that the work load for paying employees has been reduced substantially in the last three years because of the reduction in Lago's total work force. The study specifically revealed that at the Main Gate, for example, 90 per cent of the afternoon transactions took place between 3:30 and 4:30 p.m.

The Saturday pay schedules for both monthly and semi-monthly em-

ployees have also been revised. The complete schedule changes can be found elsewhere in this issue of the Aruba Esso News. New pay schedules will be available at pay locations on payday.

By paying monthly payroll employees in the morning on scheduled paydays, it is expected that the Lago Commissary will get a more even distribution of business throughout the day.

Cambio den Ora di Pago Quincenal y Mensual Ta Drenta na Vigor Juni 8

Cambianan den oranan di pago quincenal y mensual lo drenta na vigor Juni 8 como mehoracion adicional di operacionnan di payroll. Solamente oranan di pago lo worde cambiá. Dianan di pago lo sigui cai ariba e fechanan publica na principio di anja.

Ariba Juni 8, periodonan di pago pa empleadonan ariba payroll quincenal lo worde reduci door di no menos cu hora y mei ora den merdia y aumentá mei ora den mainta na Porta Mayor. E periodo di pago di mainta na e otro tres lugarnan di pago lo worde i cambia.

Cuminzando Juni 9, empleadonan pagá mensualmente lo ricibi nan envelop di pago durante mainta envez di merdia. Preparacion di payroll mensual mitar dia mas tempran a worde haci posible door di uso di e sistema calculador nobo IBM 1410, cual por haci mas trabao y contene mas informacion cu mas rapidez y adaptabilidad cu e sistema calculador IBM 650 cual el a reemplazá.

E periodo di pagamento quincenal durante mainta na Porta Mayor a worde extendé cu mei ora pa conveniencia di empleadonan. Oranan nobo d: pago ta for di 7:30 te 8:30 a.m. E oranan anterior tabata for di 8 te 8:30 a.m. E periodo di pago na Portanano No. 6, 8 y 9 lo 7:45 te 8:30 a.m.

Porta Mayor

Na Porta Mayor, el periodo di pago di merdia pa empleadonan di quincena lo worde cambiá pa 3 te 5:20 p.m. envez di e tempo anterior di 2:30 te 6:20 p.m. E periodo di pago lo worde reduci tambe na e otro tres lugarnan. Oranan nobo pa esakinan lo ta: Porta No. 6 — 3:30 p.m. te 4:20 p.m. y Portanano No. 8 y 9 — 3:30 p.m. te 4:30 p.m.

E cambianan den tempo di oranan di pago a resulta for di un reciente estudio cual a indica cu e cantidad di trabao pa paga empleadonan a worde reduci considerablemente den e ultimo tres anjanan pa motibo di reduccion di personal total di Lago. E estudio specificamente a revela cu na Porta Mayor, por ehemper, 90 por ciento di e transaccionan a tuma lugar entre 3:30 y 4:30 p.m.

E oranan di pago ariba Diasabra pa ambos empleadonan quincenal y mensual tambe a worde revisá. E lista completa di oranan cambiá por worde obtenci na otro parti den e edicion aki di Aruba Esso News.

Door di paga empleadonan pagá pa luna durante mainta ariba dianan di pago estableci, ta worde sperá cu Comisario di Lago lo haya un mejor distribucion uniforme di negocio durante henter dia.

To Look Back on Youth

The age of Lago employees averages about thirty-seven years. The average Lago employee is in the prime of his productive life. He does with it as he wills, and when he becomes one of the elder citizens of the community he has himself to question how his years were spent.

Quick, unthinking conclusions often are phrased with "giving one's youth." When an irate person or perhaps one basically disappointed in himself shouts "and I gave you my youth," it is time for that person to question: What did I do with my youth?

People don't give their youth to anyone. Youth is a period of life that must be lived, and something must be done with it. It can be wasted or half-lived thereby giving the disgruntled the opportunity to blame others when he feels he "gave his youth." A man who has led a productive life has led a wholesome, satisfying life. He considers his youth well spent in terms of personal accomplishments and spiritual blessings. He does not feel he gave his youth to anyone. Rather, he feels he used the vigor and drive of youth to produce for himself or for another in such a way that he shared in the good.

Two Replies

The answer to what our hypothetical elder did with his youth could take many forms, but would probably end up nearer two replies. The irate individual, if honest with himself, would probably not care to inspect his past, and if he did would probably settle out for roughly what he did originally.

The second reply might possibly use the wisdom that only age and experience can give. The individual, now less irate, might recall when he — not someone else, but he — might have taken greater advantage of his youth. He could, if he didn't surround his past with excuses, realize that he had not given his youth to anyone. Youth had been given to him and how he used it was left to his decision, his initiative, his ambition, his determination, his desire, his industriousness. With these and other facets of his character he had the opportunity to gain through youth.

But he didn't give it to anyone. He used it to his own satisfaction or he threw it away, later to claim that others took it from him. It was a wise old Italian philosopher who framed the ironic note that it takes age to realize the benefits of time and youth, only we attain age after we have lost much of time and youth.

Mirando Riba Hubentud

E edad promedio di empleadonan di Lago ta mas cf menos treinta y siete anja. E empleado promedio ta na e punto halto di su bida productivo. El ta haci cu esey manera e ta deseja, y ora el bira un di e ciudanano mas bieuw di comunidad, el mester puntra su mes con su anjanan a worte pasá.

Conclusionnan rápido, sin pensa hopi vez ta papia di duna su hubentud na tal y tal. Ora un persona iritá, of podiser uno basicamente desapunta den su mes, grita "y mi a duna bo mi hubentud," ta tempo pa e persona puntra su mes: kiko mi a haci cu mi hubentud?

Hende no ta duna nan hubentud na ningun otro. Hubentud ta un periodo di bida cu mester worde bibá, y algo mester worde haci cu ne. E por worde malgastá of mitar bibá asina dunando e malcontentonan e oportunidad pa culpa otro ora el ta santi cu "el a duna su hubentud." Un homber cu a hiba un bida productivo a hiba un bida sano, cu ta duna satisfaccion. El ta considera su hubentud bon pasá den sentido de acomplecimiento personal y bendicion spiritual. El no ta santi cu el a duna su hubentud na ningun hende. Mas liher el ta santi cu el a usa e vigor y energia di su hubentud pa produci algo pa su mes of pa un otro den tal forma cu el a comparti di e bondad.

Dos Contesta

E contesta kiko nos ehemplo a haci su hubentud por tuma hopi forma, pero mas probablemente ta resulta den un di dos contesta. E persona rabiá, si el ta franco cu su mes, probablemente lo no preocupa pa inspecciona su pasado, y si el haci esey, probablemente el ta keda conforme cu loke el a haci originalmente.

E di dos contesta posiblemente por usa e sabiduria cu solamente edad y experiencia por trece. E persona, awor menos rabiá, por recordar tempo cu el — no ningun otro hende, pero el — por a probecha mejor di su hubentud. El por, si el no a yena su pasado cu desculpa, realiza cu el no a duna su hubentud na ningun hende. Hubentud a worde duná na dje y con el a use'le tabata depende henteramente di su decision, su iniciativa, su ambicion, su determinacion, su deseo, su zelo. Cu esakinan y otro faceta di su karakter el tabatin e oportunidad pa gana pa medio di hubentud.

Pero el no a dune'le na ningun hende. El a use'le pa su mes satisfaccion of el a tire'le afor, y despues pa bisa cu otro a coge'le for di dje. Tabata un filosofo Italiano bieuw kende a bisa ironicamente cu ta tuma edad pa realiza e beneficianan di tempo y hubentud, pero lástima cu nos ta haya edad solamente ora nos a perde hopi tempo y hubentud caba.

Off-Job Safety Speakers To Take Messages to Five Credit Unions and Clubs

Members of the Off-the-Job Safety Speakers Bureau will give speeches at five organizations between now and June 15. Safety talks, accompanied by film showings, will be given June 6 at the Dakota Credit Union, June 13 at the San Francisco Credit Union in Oranjestad and the St. Theresita Credit Union in San Nicolas, June 14 at the Yamanota Club and June 15 at the Paradera Credit Union. All programs are scheduled to start at 8 p.m.

I. Neblett Honra door di Fraternidad di Ingeneria Electrico na Universidad

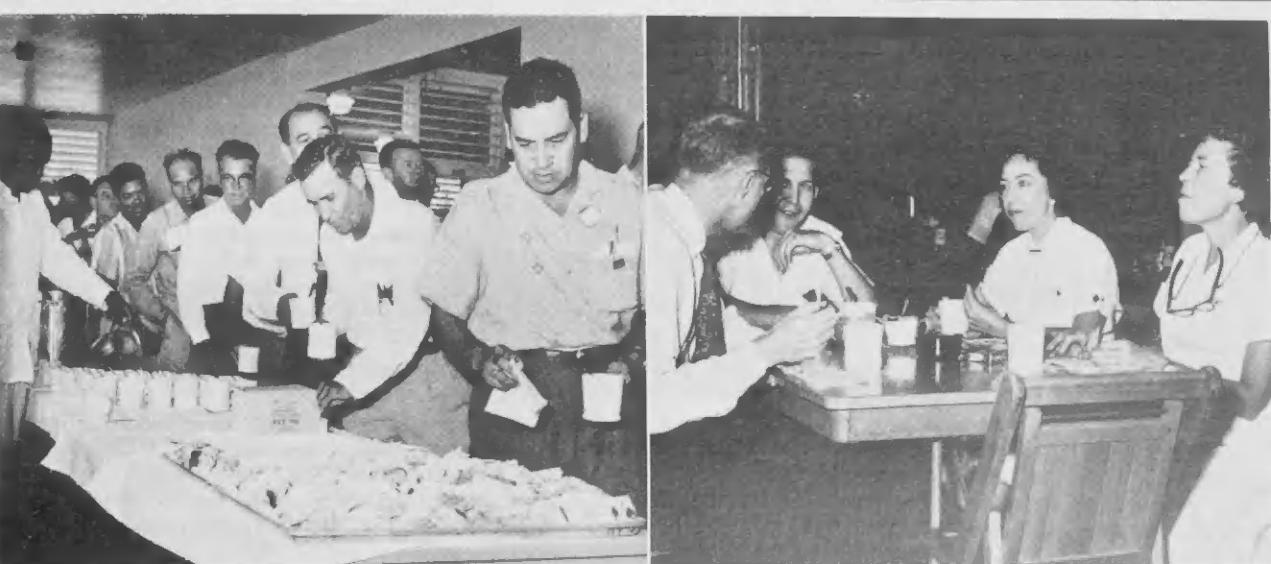

Isaac Neblett, un ex-empleado di Lago, a worde elegi tesorero di Delta Chapter di Kappa Eta Kappa, un organizacion na Universidad di Wisconsin. Kappa Eta Kappa ta un fraternidad nacional pa estudiantenan cu ta specializá den ingenieria electrico.

Sr. Neblett tabatin diezcinco anja di servicio y tabata un Electricien A den Mechanical-Electrical tempo cu el a laga Lago na Augustus 1960 pa obtene un educacion mas avanzá.

AT MANAGEMENT Information Sessions held May 10 and 11, more than 550 management members heard President W. A. Murray, right, speak on the over-all petroleum industry and M. E. Fisk, left, who heads the Antilles Chemical Company, describe Aruba's petrochem industries.

MANAGEMENT MEMBERS were served refreshments during a break in the session. Reflecting on the talks, right, are Medical Department personnel.

MIEMBRONAN SUPERVISORIO a worte sirbi cu refresconan durante un pausa den e sesion. Reflejando arriba e discursionan, drechi, ta personal di Medical.

Lago Donates 750 Copies of History Of Aruba to U. S. Colleges, Libraries

Major colleges, universities and public libraries in the United States are getting an invaluable reference work for students, scholars and travelers interested in Aruba and its history. The work is the English edition of Dr. J. Hartog's book, "Aruba Past and Present." Lago is donating 750 copies of the book to 300 colleges and universities and 450 public libraries located in all the fifty states.

The books were contracted for by Lago to help subsidize the English language edition. The only complete history of Aruba, the book was published in Dutch several years ago. The copies are being sent to the United States now and mailing should be completed in about two months.

Both the Dutch and English editions were published by D. J. De Wit, an Oranjestad businessman.

Dr. Hartog's work encompasses the island's complete history from ethnic origins of its peoples to present-day political and industrial dev-

elopments. Major areas explored include social, religious and economic growth with discourses on archeology, geology and geography. Years of research preceded Dr. Hartog's writing in which he aptly weaves his findings into a valuable history of Aruba.

The English editions will be available all over the country and in far off Hawaii and Alaska. The latter have one university and major public library each. On the other hand, New York state has thirty-three universities and forty-two libraries that will receive the books.

Historia di Aruba Duna door di Lago Na Colegianan y Biblioteca di Merca

Colegianan, universidadnan y bibliotecanan publico principal den Estados Unidos ta hayando un obra di referencia invaluable pa estudiantenan, profesor y viaheronan interesá den Aruba y su historia. E obra ta e edicion Ingles di e boeki di Dr. J. Hartog "Aruba - Past and Present." Lago ta regalando 750 copia di e boeki na 300 colegianan y universidadnan y 450 biblioteca publico situá den tur 50 estadonan.

E boekinan a worde contractá door Lago pa yuda paga e edicion den idioma Ingles. E unico historia completo di Aruba ta conteni den e boeki aki cual a worde publicá na Holandes varios anja pasá. E copianan ta worde mandá pa Estados Unidos actualmente y postmento lo worde completá dentro di mas o menos dos luna. Ambos edicionnan Holandes y Ingles tabata publicá door di De Wit.

Dr. Hartog su obra ta encerrá historia completa di e isla for di origen Alaska.

etnico di su pueblo te na e desaroyo actual politico y industrial. Asuntan relatá ta inclui desaroyo social religioso y economico y descripcional archeologico, geologico y geografico. Anjanan di estudio a precede e scirbimento, den cual Dr. Hartog habilmente a combiná hunto su descubrimiento den un historia valuble pa Aruba.

E edicionnan Ingles lo ta disponible tur parti den e pais y tambe den estadonan leuw manera Hawaii y Alaska.

Fiesta di Directiva di Lago Teni Mei 11 na Aruba Caribbean Hotel

Notanan serio di e ultimo Session Informativo di Directiva e mainta di Mei 11 tabata reemplazá pa variedades musical e anochi ey ora cu mas di 500 miembro di directiva a congregá na Aruba Caribbean Hotel pa e fiesta anual di directiva di Lago.

Monica Boyar, anuncia como un cantatriz bochornoso, y e cuarteto Harry Hellings tabata mas destacá den nan presentacion ariba e escenario banda di piscina.

E anochi a principia cu un ora tradicional di cocktail y saludos di president di Lago, W. A. Murray. E parti di diversion y rifa di prijs di porta a cumenza na fin di e comida cuial a pacifica stoma di huespednan cu un plato suficiente di aperativo y otro cuminda.

Prijsnan di porta cu a worte ganá door di diestres donjonan suertario di tikete tabata inclui setnan di Atlas Pylon Cushionnaire tire, 3000 liter di Esso premium gasolin y cuatro bateria Atlas. E anja aki tabatin un rifa special pa miembran di directiva kende nan asignacion di trabao a preventi nan di atende e fiesta. Den e rifa aki, Capt. J. N. Bligh di Marine Department a gana 500 liter di gasoline.

Otro ganadornan di premio tabata A. H. Lee, General Services, 500 liter di gasoline; E. R. Carroll, Process, bateria; R. A. Wolff, General Services, cuatro tire; R. Croes, T.S.D., 500 liter di gasoline; W. F. Hughes, Mechanical, bateria; Dr. J. D. Schendstok, Medical, cuatro tire; C. C. Dunlap, Industrial Relations; 500 liter di gasolin; H. J. Turner, Marine, bateria; A. J. Huibers, Lago Police, 500 liter di gasoline; K. L. Weill, Industrial Relations, 500 liter di gasolin; H. C. Miller, TSD, bateria, y D. Fryback, Mechanical, cuatro tire.

Lago's Annual Management Party Held May 11 At Aruba Caribbean

EXECUTIVES WHO greeted guests included B. C. Clarkson, foreground, assistant general manager, and President W. A. Murray. Over 500 attended the annual party.

EHECUTIVONAN KENDE a saluda huespednan tabata inclui B. C. Clarkson, adilanti, assistente gerente general, y President W. A. Murray. Mas cu 500 a atende e fiesta anual.

More Than 500 Guests Enjoy Dinner, Hotel Entertainers and Prize Drawings

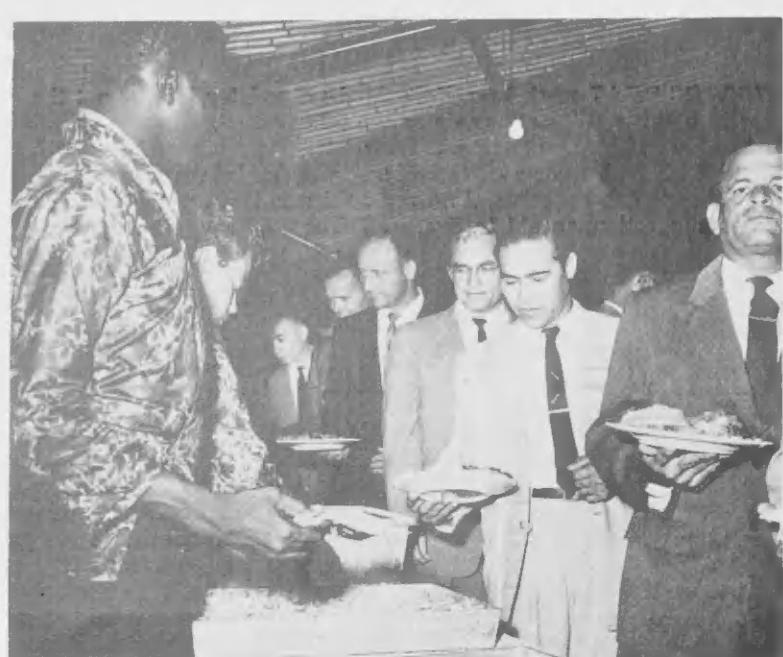

Serious notes of the final Management Information Session the morning of May 11 were replaced with the musical variety that evening when more than 500 management members assembled at the Aruba Caribbean Hotel for Lago's annual management party.

Monica Boyar, billed as a sultry songstress, and the Harry Hellings Quartet were the headliners on the pool-side stage. Accompanying Miss Boyar was George Fasola and his hotel orchestra.

The evening started with the traditional cocktail hour and greetings from Lago's president, W. A. Murray. Entertainment and drawings for door prizes commenced at the conclusion of the dinner which placated guests with man-sized portions of entrees and side dishes.

Door prizes won by thirteen lucky ticket holders were three sets of Atlas Plycron Cushionnaire tires, 3000 liters of Esso premium gasoline and four Atlas heavy-duty batteries. This year there was a special drawing for management members whose work assignments prevented them from attending the party. In this drawing, Capt. J. N. Bligh of the Marine Department won 500 liters of gasoline.

Other prize winners were A. H. Lee, General Services, 500 liters of gasoline; E. R. Carroll, Process, battery; R. A. Wolff, General Services, four tires; R. Croes, TSD, 500 liters of gasoline; W. F. Hughes, Mechanical, battery; Dr. J. D. Schendstok, Medical, four tires; C. C. Dunlap, Industrial Relations, 500 liters of gasoline; H. J. Turner, Marine, battery; A. J. Huibers, Lago Police, 500 liters of gasoline; K. L. Weill, Industrial Relations, 500 liters of gasoline; H. C. Miller, TSD, battery, and D. Fryback, Mechanical, four tires.

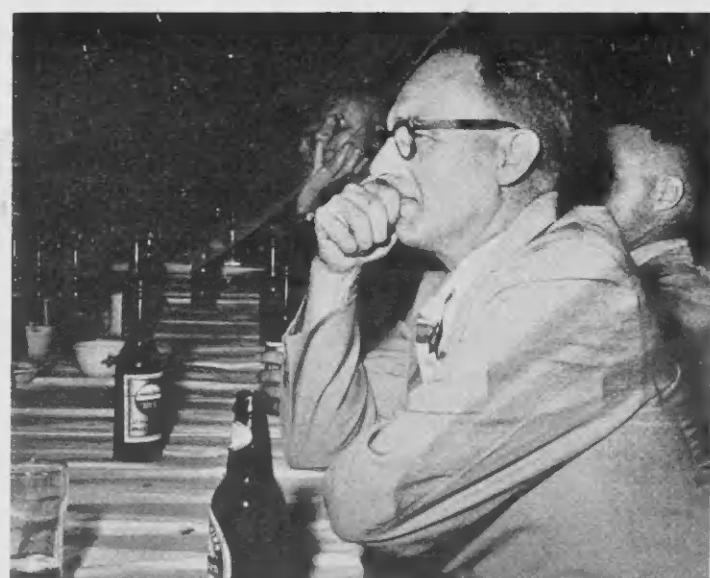

IT WOULDNT be a management party without man-sized portions of tasty foods, above. The floor show has the complete attention of this management member, below.

ESAKI LO no tabata un fiesta di directiva sin abundante platonan di cuminda sabroso, ariba. ■ presentacion ariba ensenario tin completo tencion di e miembro di directiva aki, abao.

CONVIVIALITY WAS the keynote of the May 11 affair. Guests above enjoy the show.

BUEN HUMOR tabata lo principal den e fiesta Mei 11 Huespedes ariba ta goza e show.

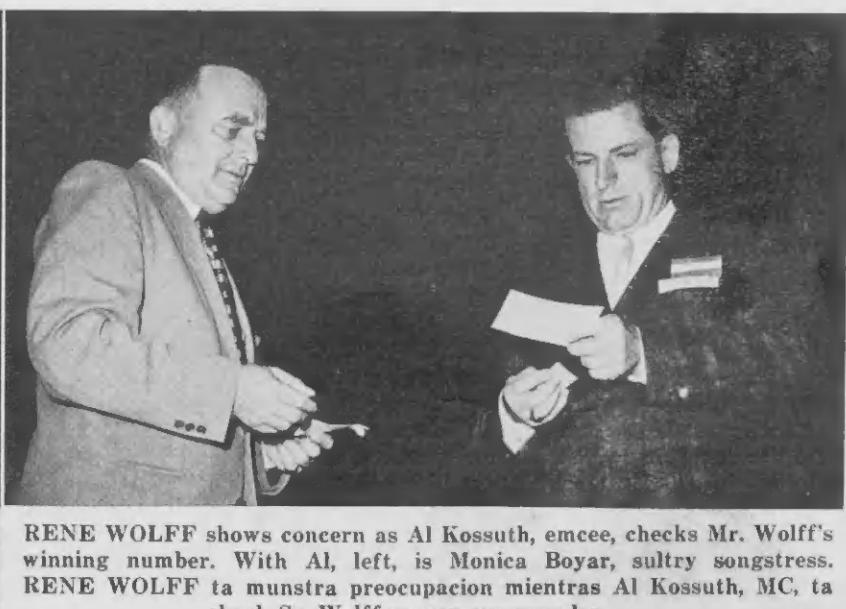

A GREAT fancier of the twist, being performed, left, by Harry Hellings and his vocalist, is J. L. Patterson.

UN GRAN amante di twist, cual ta worde presentá door di Harry Hellings y su vocalista, robez, ta J. L. Patterson.

A MASTER of sleight-of-hand tricks was George Carolly who appears to have an endless supply of dollar bills.

UN MAESTRO di trikinan di man tabata George Carolly, kende parce tin un cantidad sin fin di biljete di dollar.

RENE WOLFF shows concern as Al Kossuth, emcee, checks Mr. Wolff's winning number. With Al, left, is Monica Boyar, sultry songstress. RENE WOLFF ta munstra preocupacion mientras Al Kossuth, MC, ta check Sr. Wolff su numero ganador.

What Would You Do...

If Your Child Ate Poison?

By the time Nancy reached her, Debbie was screaming and had turned blue. Her mouth inside and out was burned raw. White crystals from the can of drain cleaner were sprinkled on the floor and down the front of her blouse. A few clung to her tiny fist that dug at her mouth in a bewildered attempt to kill the pain.

In panic, Nancy knew she should act quickly — speed was important she had read somewhere. So she did the first thing that occurred to her; she jammed her finger down Debbie's throat and the little girl gagged, bringing up some of the poison.

Nancy's next thought was to call the family doctor; he had an

FOUR EASY STEPS TO REMEMBER

1. Dilute the poison by making the child drink water.
2. Make him vomit unless he has burns around the mouth, or has swallowed petroleum products or is unconscious or in convulsions.
3. Call a physician.
4. Keep the child warm; keep his air passage open; give artificial respiration, if necessary.

UNFORTUNATELY, A mother's first instinct is to make a child vomit. Sometimes this can be dangerous. DESAFORTUNADAMENTE, UN mama su promer pensamento ta pa haci un mucha saca. Tin viaha esaki por ta peligroso.

Five Ways You Can Prevent Poisonings

Nearly all accidental poisonings could be prevented if the toxic materials were stored and handled properly, according to the National Clearing House for Poison Control Centers. Here are precautions to take:

1. Lock your medicine cabinet. Drugs, including the largest offender, aspirin, account for one-third of all fatal poisonings in children under five. It is not enough to put medicines on high shelves, for children in the climbing stage will go to amazing heights in search for forbidden items.

2. Don't keep household chemicals under the kitchen sink. The one-year-old who crawls under the

sink to ingest bleaches and lyes, accounts for thirty-seven per cent of poisoning cases, according to one study. Hazardous household products belong on high shelves, preferably in a locked compartment, inaccessible to the crawler.

3. Never transfer a poisonous substance, such as turpentine into a common container such as a cola or milk bottle, drinking glass or pitcher. A child could easily mistake the poison for food or drink.

4. Never put poisons in cupboards used for food storage.

5. Make a regular check around the house to be sure poisonous items are not within a child's reach. Danger areas are kitchen, bedroom and bathroom.

Casi tur venenamiento accidental por a worde preventi si e cosnan venenosos tabata wardá of tratá bon, segun National Clearing House for Poison Control Centers. Aki ta sigui precaucionnan cu por worde tumá:

1. Cerra bo kashi di medicina na yabi. Remedi, incluyendo e mas grandi ofensor Aspirin, ta responsable pa un-tercera parti di tur venenamiento fatal pa muchanan bao cinco anja. No ta suficiente pa pone medicina arriba rekki halto, pasobra muchanan den periodo cu nan ta cuminza subi cualquier parti ta yega haulturanan sorpresante en busca di articulonan prohibi.

2. No tene quimico domestico bao di lavaplatos den cushiona. Muchanan di un anja cu ta gatia bao lavaplatos y ta come of bebe quimico di haci limpi ta

responsable pa trinta y siete por ciento di casonan di venenamiento, asina un estudio a munstra. Producionan domestico peligroso ta pertenece arriba rekki halto, preferiblemente den un particion na yabi, na unda un mucha cu ta gatia no por yega.

3. Nunca no pasa un liquido venenosos, manera turpentin, den un contenedor comun manera den un botter di colia de lechi, den glas de canica. Un mucha facilmente por tuma e veneno pa cuminda of algo di bebe.

4. Nunca pone veneno den kashi cu ta worde usa pa pone cuminda.

5. Haci un check regular rond y den cas pa bo ta sigur cu articulonan venenosos no ta dentro di alcance di muchanan. Lugarnan peligroso ta cushiona, kamber y banjo.

ambulance dispatched immediately. Within twenty minutes, doctors in the hospital's emergency room were pumping Debbie's stomach. But the tissue of her stomach and esophagus had been severely eaten by lye in the cleaner, and her chances of living, reported Nancy's doctor, were not more than 50-50. What he didn't tell Nancy was that the odds might have been much better if she had handled the emergency correctly. Forcing Debbie to vomit had wrought extreme damage. The lye, drawn up from the stomach, had a second chance to contact the esophagus wall and perhaps even rupture it. But Nancy never realized her tragic mistake, for after Debbie died the doctor saw no reason to add self-recrimination to a parent's grief.

Would you have known what to do if Debbie had been your child? Or would you, like Nancy, have fumbled in ignorance while your child's life drifted away?

Ask yourself the hard question: Just what would I do if my child swallowed poison?

Ten women who were asked that question gave these answers: four would call the doctor immediately, three would force the child to vomit, two would rush him to a hospital and one would "whip up the universal antidote."

All the women were wrong, according to a committee on accidental poisoning for the American Academy of Pediatrics. After intensive study of emergency treatment for poison, these experts recently concluded that a mother's first concern should be to dilute the poison in a child's stomach by making him drink water (or any other nonpoisonous liquid). The usual recommended dose is two cups for children up to five years old and a quart for those over that age. The liquid weakens the strength of the poison solution, slowing down its deadly action.

When is Vomiting Best?

Making a child vomit should be step number two — sometimes, said the committee. And that qualification "sometimes" is important.

"Few people realize that vomiting in some cases can do more harm than good," said pediatrician Robert Frazier. "If the poison is a corrosive, such as lye, ammonia, household bleach or acid, vomiting only increases tissue damage." Corrosive poisons eat tissue and leave tell-tale burns in the child's mouth.

(Continued on page 6)

ANTIDOTES THAT work beautifully in the chemistry lab are not the answer in a crisis. Water may do as well. Dramatizing these suggestions are Mrs. K. J. Tong and daughter Betty, age two and one half. REMEDI CONTRA veneno cu ta traha bunita den laboratorio quimico no ta responde den un crisis. Awa por sirbi mes bon tambe. Dramatizando es suggestionnan aki ta Sra. K. J. Tong y su yiu muher Betty.

Kiko Lo Bo Haci...

Si Bo Yiu Come Veneno?

Ora Nancy a yega cerca dje, Debbie tabata grita y ya a bira blaau. Paden y pafor di su boca tabata kimá te na carni bibo. Cristalnan blanco for di e bleki di quimico limpiador tabata plamá ariba vloer y ariba su blusa. Algun di e cristalnan tabata pegá na su mometa chikito cual tabata coba den su boca den un esfuerzo nervioso pa stop e dolor.

Den su susto, Nancy tabata sabi cu e mester actua rapidamente — rapidez tabata importante el a yega di leza un parti. Asina el a haci e promer cos cu a bini den su mente; el a hinca su dede den garganta di Debbie y e mucha muher chikito a tosa y fersa, sakando algo di e veneno.

Nancy su siguiente pensamento tabata pa yama dokter di cas; esaki a manda un ambulance mes ora. Dentro di binti minuut, dokternan den kamber di emergencia di e hospital tabata pomp stoma di Debbie. Pero ya banda paden di e stoma y su gulido a worde comi severamento door di e quimico limpiador y su chens di scapa, segun dokter di Nancy a bisa, no tabata mas cu 50-50. Loke el no a bisa Nancy ta-

bata cu e chens lo tabata hopi mejor si el a trata e emergencia aki mas correcto. Door di forza Debbie pa saka, el a causa hopi danjo. E quimico cu a bolbe sali for di e stoma, tabatin un segundo chens di pasa den e gulido y podiser kibre'le mas. Pero Nancy nunca a realiza su error tragic, pasobra despues cu Debbie a muri e dokter no a mira motibo pa agregar na e tristeza di e mama tambe su mes culpabilidad.

Lo bo tabata sabi kiko haci si Debbie tabata bo yiu? Of abo tambe, mescos cu Nancy, lo a keda confundi den bo ignorancia mientras bida di bo yiu ta cabando?

Puntra bo mes e pregunta serio aki: Kiko precies lo mi haci si mi yiu mester guli veneno?

Diez dama kende a worde puntrá e pregunta ey a duna e siguiente contestan: cuatro lo yama dokter mes ora — tres lo forza e mucha pa saka — dos lo hibe'le mes ora pa hospital — y uno lo "prepara e contra-veneno universal mes ora."

Tur e damanan tabata robez, segun un comité tocante venenamiento accidental di e Academia Americano di

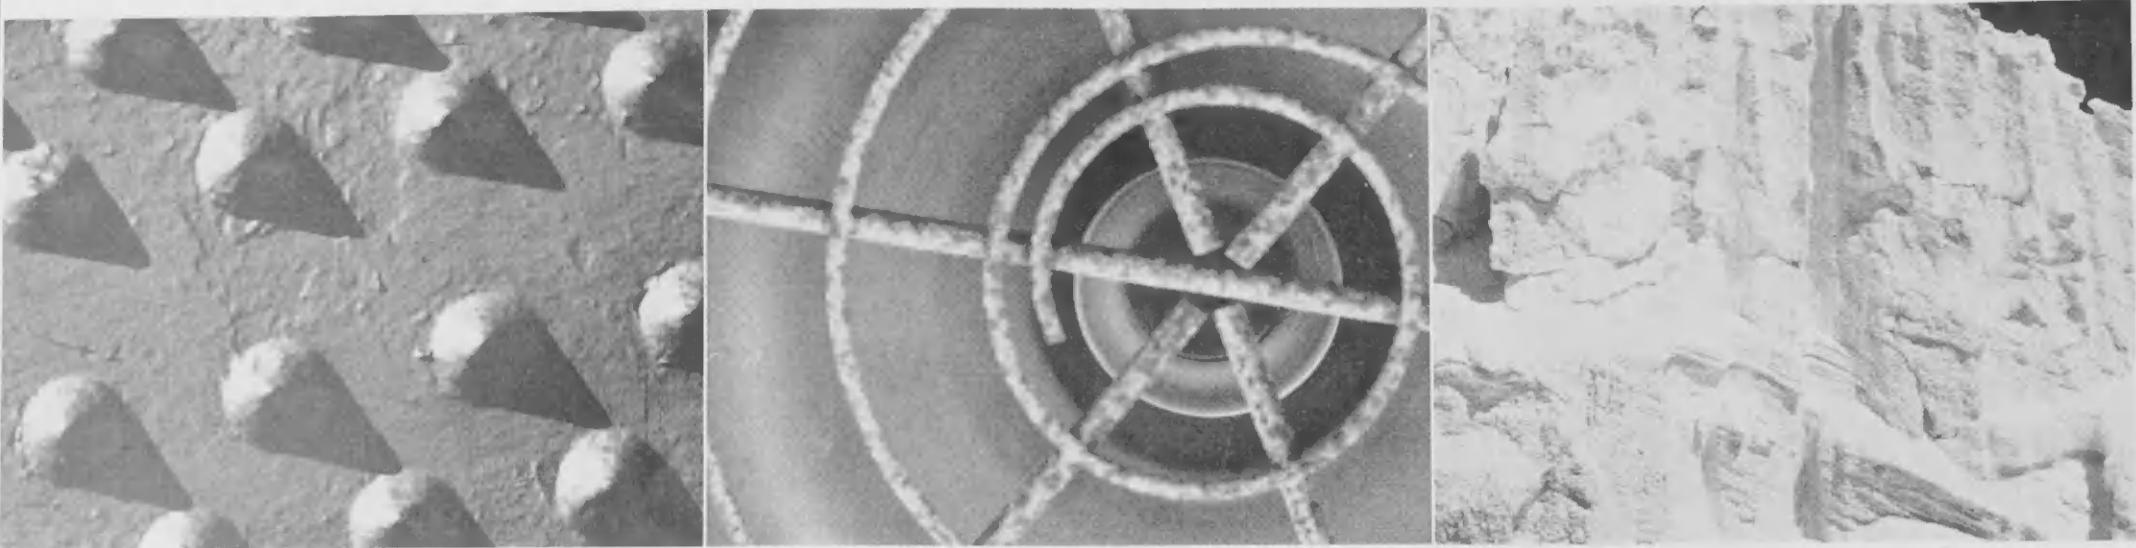

Scienzia Medico pa Infante. Despues di estudio intenso di tratamiento di emergencia contra veneno, e expertonan aki recientemente a conclui cu e promer preocupacion di un mama mester ta pa disolve e veneno den e stoma di un mucha door di pone'le bebe awa (of qualquier otro liquido cu no ta venenoso). E cantidad generalmente recomendá ta dos koppi pa muchanan te cinco anja di edad y un cuarto gallon (of dos pinchi) di awa pa esnan ariba tal edad. E liquido ta zwak e foraz di (Continua na pagina 6)

CUATRO PASO FACIL PA CORDA

1. Disolve e veneno haciendo e mucha bebe awa.
2. Hacie'e saka, contal cu e no tin quemadura rond di su boca of a guli producto di petroleo of ta foi tino of den atake.
3. Yama un dokter.
4. Tene e mucha cayente; tene su canal respiratorio habri; aplica respiracion artificial, si ta necesario.

A HURRIED call to get a doctor's advice is essential. But when? Before or after you administer first aid? UN YAMADA purá pa dokter bini ta un conseho esencial. Pero ki ora? Promer of despues cu bo a duna promer auxilio?

THE ARUBA Flying Club had its charter approved by the government in April, 1942, and obtained its first aircraft six months later. Well-known figures in the group, left, posed with the first plane, are (1) F. W. Switzer, (2) H. W. Orr Jr., (3) B. Teagle, (4) Lt. Comdr. P. A. de Vuijst, and (5) W. L. Ewart, who is still a club member. Current members and guests pose, right, in front of the barely visible Cessna 182, the club's newest acquisition.

ARUBA FLYING Club su statutonan tabata aprobadoor di gobierno na April 1942 y a obtene su promer avion seis luna despues. Personalidadnan bon conoci den e grupo hundo cu e promer avion ta, robez, (1) F. W. Switzer, (2) H. W. Orr Jr., (3) B. Teagle, (4) Lt. Comdr. P. A. de Vuijst, y (5) W. L. Ewart, kende ainda ta un miembro di club. Miembranan actual y huespednan ta posa, banda drechi, en frente di e Cessna 182 poco visible.

Aruba Flying Club Founder Christens New Club Aircraft W.L. Ewart Given Honor; Club Selects His Initials for Aircraft's Registration

ASSISTED BY F. H. Himes, former owner of the Cessna, Mr. Ewart christens the new club plane. ASISTI DOOR DI F. H. Himes, donjo anterior di e Cessna, Sr. Ewart ta batiza e avion di club.

When W. L. Ewart was lured out to De Vuijst Field May 12 he may have had an inkling that something was in the air. Little did he realize, though, as he drove up to the Aruba Flying Club complex, that before the afternoon was over he would be the focal point of a cocktail party and would christen the club's newly-purchased Cessna 182. His biggest surprise of the day was the discovery that his initials — WLE — were affixed to the plane's fuselage and wings as the distinctive part of its registration letters. Mr. Ewart, Process-Utilities division superintendent, was being honored for his vast contributions to the club. The only charter member still in the club, he plans to retire from Lago this October.

In the presence of over forty club members and guests, including F. W. Switzer and W. A. Murray, Mr. Ewart christened the Cessna by pouring a glass of champagne on its propeller spinner. Later he said, "I felt it was a very great honor and I want all concerned to know that I really appreciate their thoughtfulness."

In late 1941, he helped write the club's charter. Government approval for the charter was obtained through the support of Lt. Comdr. P. A. de Vuijst. The Aruba Flying Club's first plane was a Piper Cub.

AS A charter member, Mr. Ewart was instrumental in preparing the club's constitution. In honor of his vast contributions, the club chose his initials — WLE — for the plane's registration letters.

COMO UN miembro fundador, Sr. Ewart tabatin parti den preparacion di e statuto di e club. En honor di su contribucionnan grandi, e club a escoge su inicialnan — WLE — pa e letranana di registracion di e avion.

W.L. Ewart Honra; Club A Selecta su Inicialnan pa Registracion di Avion

Preveni Venenamento

(Continua di pagina 4)

e solucion venenoso, asina retardando su accion mortal.

Haci e mucha saka mester ta paso numero dos — algun bez, asina e Comite ta bisa. Y e nificacion di "algun bez" ta importante.

"Poco hende ta realiza cu sakamento den algun caso por haci mas danjo cu bon," asina dokter di mucha Robert Frazier a bisa. "Si e veneno tin substancia corrosivo aden, manera quimico, amonia, acido of otro liquido pa uso domestico, sakamento solamente lo haci mas danjo na bo curpa." Veneno corrosivo ta come partinan mas delicado di bo curpa y ta laga marca di kimamento den boca di un mucha. Sigui e regla aki, asina Dr. Frazier ta bisa; "Si quemadura ta visible den boca di e mucha, no forse pa saka."

"Tampoco no mester haci un mucha saka si el a bebe producto di petroleo, manera kerosin, gasolin, polish di muebla, liquido pa lighter, liquido pa haci limpi, benzin of nafita," Dr. Frazier ta agrega. "Den e caso aki, loke worde saká por bai den su pulmonnan y causa pulmonia bronchial.

"Y tampoco sakamento no ta recomendá si e victimta ta foi tino of ta haya atake."

Den tur otro casonan di venenamento, dokternan di mucha ta recomenda pa haci e mucha saka door di kishiki den su garganta cu bo dede of door di dune'e un liquido vomitivo, manera awa di habon poco cayente.

Despues, yama dokter, e comite di dokternan di mucha ta recomienda. Pero, pakiko no yama e dokter promer? Ta claro cu e procedimento ideal ta pa un persona notifica un dokter mientras un otro ta duna promer ayudo. Pero, si bo ta sol, tratamiento di emergencia mes ora ta bini promer! E promer minuutnan critico por bien dicidi suerte di e mucha. Naturalmente, den ningun caso bo mester perde tempo precioso

PREVENT POISONINGS

(Continued from page 4)

Follow this rule, advises Dr. Frazier: "If burns are apparent in a child's mouth do not force him to vomit.

"Nor should a child be made to vomit if he has swallowed petroleum products, such as kerosene, gasoline, furniture polish, lighter fluid, cleaning fluids, benzine and naphtha," added Dr. Frazier. "In this case the vomitus may enter the lungs and cause broncho-pneumonia.

"And certainly vomiting is not recommended if the victim is unconscious or in convulsions."

In all other instances of poisoning, pediatricians recommend making the child vomit by tickling his throat with your finger or by giving him an emetic such as warm soapy water.

Next, call the doctor, advises the committee of pediatricians. But why not call the doctor first? Obviously, the ideal procedure is for one person to notify a physician while another administers first aid. But if you are alone, prompt emergency treatment should come first; those first crucial minutes could easily determine the child's fate.

Of course, in no instance should you waste precious time studying labels and searching for antidotes. First aid should take only a few minutes, for it is also essential to get the victim under expert medical care as soon as possible.

Pediatricians also advise you to treat the child for shock by keeping him warm. And be sure to keep his air passage open; give artificial respiration if necessary.

How Good Are Antidotes?

Antidotes are usually not worth fooling around with, said Dr. Frazier — especially the "universal antidote," which is a mixture of charcoal, milk of magnesia and tea. "We don't recommend the universal antidote because it leads people into false confidence," remarked Dr. Frazier, "and it isn't very effective anyway."

Often much time elapses before treatment because parents don't suspect a child has swallowed poison, although he begins to act "funny." With 250,000 poisonous household products on the market every mother must be alert to the poisoning hazard, especially in children up to five years old. Be suspicious if a child exhibits any of the following symptoms: sudden pain, unusual flushing or pallor, agitation, restlessness, drowsiness, nausea, vomiting, muscle twitching, convulsions, signs of fear or panic and burns around the mouth or on the skin.

At any of these signs start first aid and call the doctor. One woman merely put her child to bed with a "cold" after he began sweating, became nauseated and lethargic. When after several hours his breathing became difficult, she rushed him to a hospital. He died the next day. An overdose of aspirin, the doctor told the distraught woman.

MR. EWART, left, talks over old times with F. W. Switzer, center, another club founder, and J. Johnson, son, club member.

SR. EWART, robez, ta papia di temponan bieuw cu F. W. Switzer, centro, un otro fundador di club, y J. Johnson.

A. A. Wever Named Suggester of Month For CYI Suggestion to Install Boom Lift

The ability to come up with a practical solution to a work problem has earned A. A. Wever, pipefitter C in Mechanical-Metal Crafts, the title of suggester of the month. Mr. Wever's clever approach also earned him a Fls. 100 Coin Your Ideas award. The ingenuity of a suggestion, not the amount of the CYI award, is used to select the month's best suggester.

Mr. Wever suggested that a boom lift be installed north east of the pump room of the loading pump house to enable pipefitters to lift valves and elbows from ground level to the top of a platform. The company benefits from this installation because of the savings in crane time.

CYI awards were paid to twenty-three employees in April. The total amount paid was Fls. 1055. The largest award, Fls. 105, went to S. R. Tromp of Mechanical-Machinist for his suggestion that led to the salvaging of safety valves and relief valves from vessels about to be scrapped.

April CYI award recipients, and amounts awarded, were:

General Services

J. M. Richards	Fls. 30
V. M. Cilie	Fls. 25

Mechanical Department Administration

Oradornan Tocante Seguridad Fuera di Trabao Lo Hiba Mensahe pa Club

Miembran di Bureau di Ora-dor tocante Seguridad pafor di Trabao lo tene discursionan pa cinco organizacion entre e fecha di awe y Juni 15. Discurso di seguridat, acompanja pa presentacion di film, lo worde teni Juni 6 na Dakota Credit Union, Juni 13 na San Francisco Credit Union di Oranjestad y Sta. Theresita Credit Union na San Nicolas, Juni 14 na Yamanota Club y Juni 15 na Paradera Credit Union. Tur pro-grama lo cumenza pa 8'or di nochi.

HOISTING A valve is A. A. Wever, pipefitter C in Mechanical-Metal Crafts, who was named suggester of the month for suggesting the installation of the boom lift he is shown using.

HIZANDO UN valva ta A. A. Wever, Pipefitter C den Mechanical-Metal Crafts, kende a worde nombrá sugeridor di e luna.

A.A. Wever E Mehor di E Luna pa Su Sugestion Pa Instala un Elevador

E abilidad pa presenta un solucion practico pa un problema di trabao a trece pa A. A. Wever, pipefitter C den Mechanical-Metal Crafts, e titulo di sugeridor di e luna. Sr. Wever su solucion inteligente tambe a dune'le un premio di Coin Your Ideas di Fls. 100. E ingeniosidad di un idea, y no e suma di e premio di CYI, ta worde usá pa selecta e mejor sugeridor pa e luna.

Sr. Wever a sugeri pa un elevador worde instalá noord-oost di e lugar di pompan di Loading Pump House pa permiti pipefitternan hiza valve y elbow for di nivel di tera te ariba di un plataorma.

Premionan di CYI a worde pagá na binti-tres empleadon durante April. E suma total pagá tabata Fls. 1055. E premio mas grandi, Fls. 105, a bai pa S. R. Tromp di Mechanical-Machinist pa su idea cual a resulta den salvacion di valve-nan di escape for di instalacionnan cu lo worde kibrá.

Former Employee Honored By Electrical Engineering Fraternity at Wisconsin

Isaac Neblett, former Lago employee, has been elected treasurer of the Delta Chapter of Kappa Eta Kappa fraternity at the University of Wisconsin. Kappa Eta Kappa is a national fraternity for students majoring in electrical engineering.

Mr. Neblett had fifteen years' service and was an electrician A in Mechanical-Electrical when he left Lago in August, 1960.

SEGURIDAD

(Continua di pagina 1)

dad di Lago. E premio di promer lugar di Lago den 1961 ta e resultado di e hecho cu cada individuo tabata consciente di practiconan seguro di trabao y cu nan tabata aplicá nan na trabao. E plaqueet den Oficina Mayor hustamente ta pertenece na cada homber y muher ariba payroll di Lago. Door di sigui traha mas seguro cu ta humanamente posible, empleadon por haci 1962 e anja mas seguro den historia di compania.

Official Film of Glenn's Historical Orbital Flight Getting Group Showings

The official film of John Glenn's orbital flight is currently being shown throughout the island at various social and civic organizations. It has been shown at the Esso Club, and the Public Relations Department expects to have a showing at Lago Sport Park during the time the film is available. The Dutch Marines will also be showing the film. It must be shipped out June 9.

The film was made available through the courtesy of the North American Association and the United States Consulate in Curaçao. The hour-long color film is packed with suspense, tension, excitement and emotion. It is a skillfully directed and edited production. Film units were stationed at tracking centers and control centers throughout the path of the orbital flights. There are even scenes taken by a remote-control camera in the space ship itself. The documentary is free of animated scenes yet it takes the viewer around the world with John Glenn through the use of films taken on test orbital flights. The most emotional scene is probably the one where John Glenn's assistants give him farewell hand grips of assurance and good luck. It is not a propaganda film. But it is a film that clearly reveals the tremendous advances made in missile and space science in this decade.

It is unlikely that all demands for film showings can be met during the limited period the film is available. There is a strong possibility that it will be made available again sometime in the near future.

Film di Color di Vuelo Orbital di John Glenn Munstra na Varios Grupo

Actualmente e film oficial di vuelo orbital di John Glenn ta worde munstrá ariba henter isla na varios organizacion social y civic. El a worde munstrá na Esso Club y Public Relations Department ta spera di presenta e film aki na Lago Sport Park durante e tempo cu e film ta disponible. E Mariniers Holandes tambe lo pasa e pelicula aki. E film mester worde mandá back Juni 9.

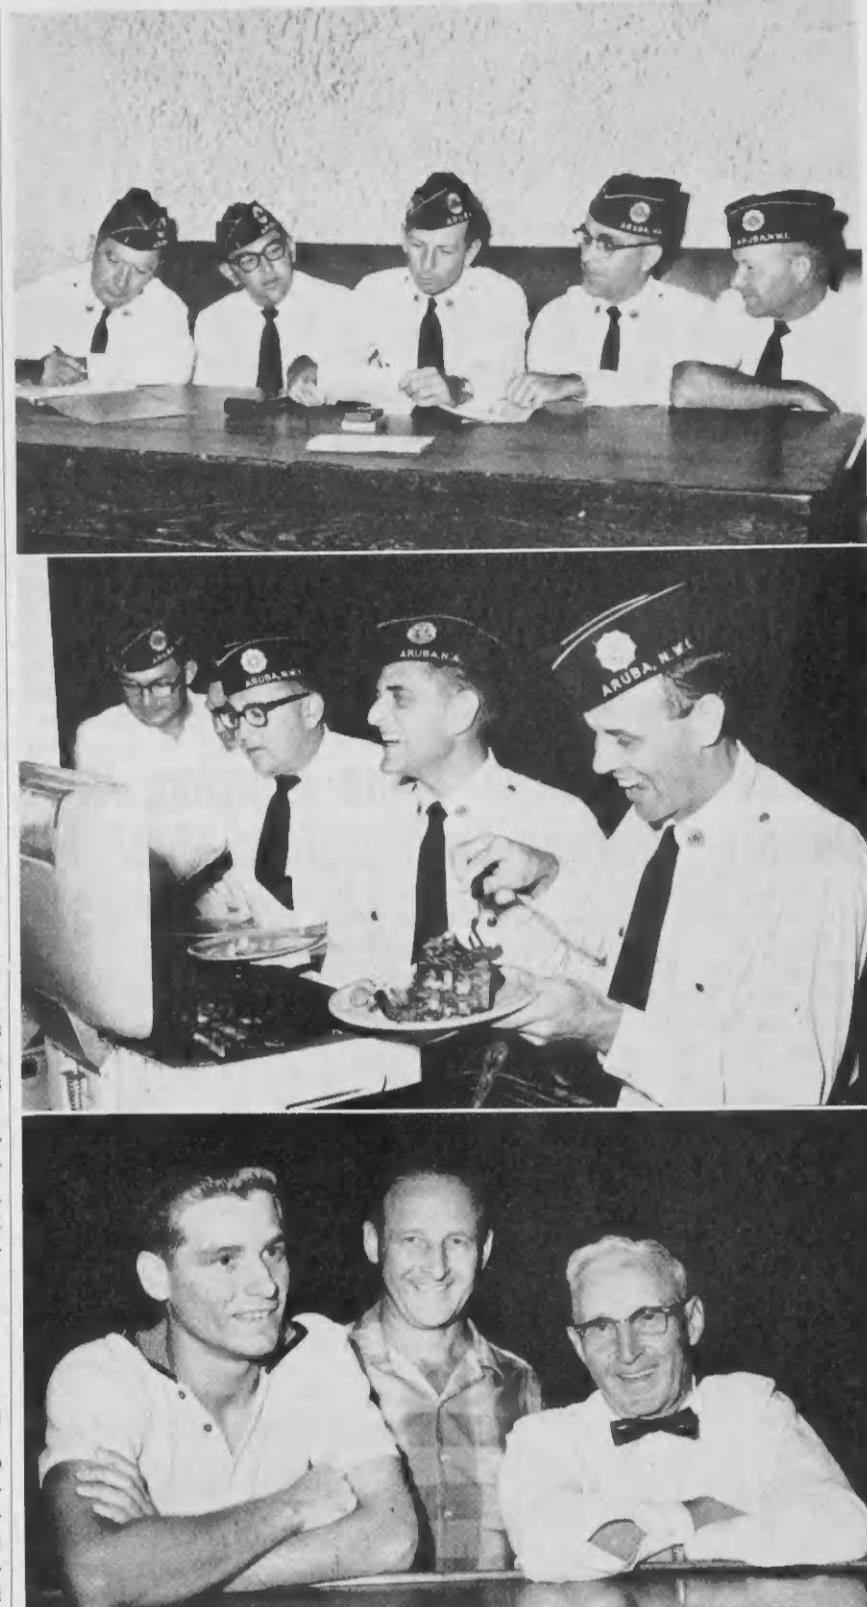

E film a worde poní disponible door di cortesia di Asociacion Norte Americano y Consulado di Estados Unidos na Curaçao. E film di color di un ora ta contene incertidumbre, tension, excitacion y emocion. E ta un produccion dirigi y editá cu habilidad. Aparatonan di saka film tabata stacioná na centronan di control di ruta durante henter e curso di e vuelo orbital. Tin te hasta escena saká door di un camera di control remoto den e nave espacial mes. E film documentario ta liber di escena animá pero sinembargo el ta hiba e mirador rond di mundo hunto cu John Glenn door di uso di filmnan saká den vuelanan orbital di experimento. E escena mas emocional probablemente ta esun unda John Glenn su asistentnan ta dune'le un apretón di man di despedida deseando e aseguranza y buena suerte.

Ta improbable cu tur demanda pa presentacion di e film aki por worde cumpli den e periodo limitá disponible. Tin un posibilidad fuerte cu el worde poní atrobe den futuro cercano.

SAFETY

(Continued from page 1)

In making these statements, Mr. Ritfeld was joining management in recognizing the employees' contribution to Lago's successful safety program. Lago's 1961 first place award is the result of every individual being aware of safe work practices and using them on the job. The plaque in the GOB rightfully belongs to every man and woman on Lago's payroll. By continuing to work as safely as humanly possible, employees can make 1962 the safest year in the history of the company.

NEW OFFICERS of the American Legion's Esso Post No. 1 were installed at May 15 ceremonies. The officers, left to right in top photo, are J. H. Watkins, adjutant; J. M. Maxey, senior vice commander; W. T. Michael, commander; C. R. Miannay, junior vice commander, and E. C. Cook, sergeant at arms. Absent were E. C. Holland, finance officer, and A. T. Willis, chaplain. In the food line, center foreground, is J. J. Payton, past commander. Note the family resemblance in the bottom photo. It's three generations of Monroes. Doug, left, attended Boys State in Panama. With him are his father Lloyd and his grandfather, V. G. Monroe.

Willis, Kapelaan. Den linja di cuminda, meimey adilanti, ta J. J. Payton, e commander anterior. Nota e apariencia di familia den e J. J. Payton. Nota e apariencia di familia den e portret mas

LEVELMAN S. G. Croes smiles appreciatively at the check he received from his fellow workers in Process-Cracking and Light Ends. He retired May 1 after a Lago career of nearly thirty years.

LEVELMAN S. G. Croes ta tira un sonrisa di aprecio riba e check cu el a ricibi for di su companjeronan di trabao den Process-Cracking & Light Ends. El a bai cu pension Mei 1 despues de un carera na Lago di casi trinta anja.

Bremo Ta Bai pa Tuma Pension; Hope, DeKort, Warner Lo Pensiona Juni 1

Plannan di pension a worde anunciará pa cuatro homber den Mechanical Department. Mei 16 tabata Tomas Bremo su ultimo dia na trabao. E Pipefitter Helper A a bai pa tuma pension despues, cumpliendo casi banti-siete anja na Lago. Retirando Juni 1 lo ta Nicolaas de Kort, foreman den Mechanical-Metal Crafts, cu trinta-y-un anja di servicio; Hope, foreman den Mechanical-Carpenter, banti-nuebe anja di servicio; y Herbert R. Warner, Carpenter A den Mechanical-Carpenter, banti-cuatro anja di servicio.

Sr. Bremo a drenta servicio di Lago Oct. 19, 1933 como un peon na Cleanout. For di 1934 te mitar di 1935, el tabata den Mechanical-Machinist. Sr. Bremo a cambia pa Mechanical-Pipe na 1935 unda el a keda te dia di su pensionamento. El a worde promovi pa Pipefitter Helper B na 1938 y a haya titulo di Helper A na 1946. Mientras cu pension el ta keda biba na su cas na Aruba.

Sr. De Kort a cuminza cu Lago Feb. 24, 1931 como un Boiler Helper den Mechanical-Boiler. El tabata encargá cu trabao di boiler durante henter su carera. Na 1936 el a avanza pa Tradesman First Class. Sr. De Kort a promove for di Sub Foreman tercera clase pa Sub Foreman A entre 1943 y 1945. Na 1950 el a worde nombrá Boiler Foreman den Mechanical Metal Crafts. Sr. De Kort lo pasa su periodo di pension na su cas na Aruba.

Sr. Hope a pasa henter su carera den departamento di Carpinté. El a drenta servicio di Lago Mei 12, 1933 ccmo un helper y na 1935 a avanza pa Second Class Tradesman. Su pro-

Bremo Leaves for Future Retirement; De Kort, Hope, Warner Will Retire June 1

Retirement plans have been announced for four men in the Mechanical Department. May 16 was Tomas Bremo's last day on the job. The pipefitter helper A left to retire subsequently after nearly twenty-seven years at Lago. Retiring June 1 will be Nicolaas de Kort, foreman in Mechanical-Metal Crafts, thirty-one years' service; Aaron Hope, foreman in Mechanical-Carpenter, twenty-nine years' service, and Herbert R. Warner, carpenter A in Mechanical-Carpenter, twenty-four years' service.

Mr. Bremo joined Lago Oct. 19, 1933, as a cleanout laborer. From 1934 through mid-1935 he was in Mechanical-Machinist. Mr. Bremo transferred to Mechanical-Pipe in 1935 where he remained until his retirement. He was promoted to pipefitter helper B in 1938 and obtained the A rating in 1946. He has retired to his home in Aruba.

T. Bremo

N. de Kort

A. Hope

H. R. Warner

Mr. De Kort started with Lago Feb. 24, 1931, as a boiler helper in Mechanical-Boiler. He has been involved in boiler work during his entire career. By 1936 he had risen to a tradesman first class. Mr. De Kort moved from a subforeman third class to subforeman A from 1943 to 1945. In 1950 he was named boiler foreman in Mechanical-Metal Crafts.

Mr. Hope has spent his entire career in the carpenter craft. He joined Lago May 12, 1933, as a helper and by 1935 had risen to a second class tradesman. His carpenter A promotion came in 1936 and by 1940 he had become a subforeman. He was named a carpenter foreman in August, 1950. He plans to return to his home in British Guiana.

Mr. Warner has remained in Mechanical-Carpenter throughout his twenty-four-year career. He started Nov. 23, 1937, as a carpenter C. In September, 1942, he received a promotion to carpenter B. Mr. Warner received his promotion to carpenter A in July, 1947.
